

8 FACTS ABOUT THE MAGNETIC NORTH POLE

It TILTS 11 degrees OFF the Spin axis of the EARTH.

The **NORTH** POLE is actually the **MAGNETIC SOUTH**

The **NORTH** and **SOUTH** poles **REVERSE** every 0.1 - 50 Million Years

The **LAST** time the poles flipped was **780,000** years ago.

The direction is determined by the **MOTION** of the Earth's molten **CORE**

The **NORTH** POLE is slowly **DRIFTING** towards **SIBERIA**

JORGE CHAM © 2019

And it's getting weaker. It was twice as strong in **ROMAN TIMES** than it is today.

Not all planets have a magnetic field. Ours may one day **DISAPPEAR**.
